

2nd QUARTERLY REPORT MAY 2017

In the second quarter, I focused on the hands on delivery of my assigned work stream. This involved working with the Public sector employees to offer the upgrades discussed and agreed upon under the Shirikiana project. From this in the consolidated list I was able to ensure that the proper process and asset evaluation was conducted to gain access and identify the necessary stakeholders who would be able to be a part of the exercise.

The top down approach towards the project allowed me to swiftly guarantee that my allocated tasks under the deployment were accomplished effectively. In this the final results were satisfactory and completely agreeable to my supervisor and the project manager.

I was also tasked in the identification and analysis of the security in the organization, ICTA and coming up with the necessary tool from myself and fellow team mates. The final cyber security assessment tool was presented. In the same I was tasked with my team mates to develop the necessary application inventory tool to be used to catalogue the organizations available applications both in house and outsourced. I concluded the second quarter by fine tuning the tasks given in accordance to my supervisor's directorial.

OBJECTIVES ACCOMPLISHED IN THE 2nd QUARTER

The following are objectives accomplished by me whilst the team:

- Security threat Assessment tool completion.
- Deployment of ICT Authority Shirikiana projects under the Microsoft environment.
- Migration of ICTA and Ministry of ICT users to be licensed with mobility licenses of Microsoft Application.
- Development of user focused SharePoint work flows.
