

PUBLIC SECTOR EXPERIENCE- POSTAL CORPORATION OF KENYA

Work assignment during our second quarter

Project Name	Task
1. PostaPesa Project	Training and Deployment PostPesa devices to Posta outlets across Nairobi, Kiambu and Kajiado Counties
2. PostGlobal Project	Preparing and setup of computer for all Posta outlets across country. Installation of all application required and setting them into the Posta VPN
3. System Application Audit	We carried out a system application audit for Posta and gave report on the current status and recommendation on areas of review.
4. User Support	Routine user support on need basis, system support and network cleanup
5. ISO Documentation- Posta	Participated in documentation for ISO certification for ICT department.- Helpdesk
6. Innovation	Smart Tender System

PostaPesa project is a banking and payment agency platform across major banks with the county. I was part of the team that assisted in implementing the devices for the payment switch across some Posta outlets. I also helped in user training on how to use the devices and the online platform.

PostGlobal Project: the project was about services digitization and provide a platform where all postal activities are management and controlled from a single window.

Smart Tender: Based on my observation on the procurement challenges within the postal corporation, the idea of smart Tender was born and is being pursued to reality.

Achievements:

1. Deployment of PostaPesa project
2. Helped in preparation and setting up of over 400 computers for the implementation of PostGlobal Project meant to digitize postal corporation services.
3. Innovation Proposal for the Smart Tender system as presented before the panel for innovations
