1st QUARTERLY REPORT JANUARY 2017

From the beginning of the program I have been attached in the ICT Authority environment. Under the security team I was assigned to work with my supervisor Mr. Edmond Wandera and other PDTP attached under the same area of specialization.

Tasks involved a major project in consolidation with the Microsoft team. There were different work streams. Under cyber security team I was working on the Windows deployment. Working together with the Microsoft team, this project dubbed the Shirikiana Project allowed for me to go through intense training in the first quarter to get properly acquainted with the proposed products. Through intense meetings and product trainings the commencement of the project has been swift and my role clearly defined has been properly in the first quarter.

Additionally different roles and responsibilities were distributed in the Security team. I was working with the team to come up with a proper asset management framework. Research was conducted and my role was to identify what necessary areas the framework would cover. Based on this recommendation the necessary tools were identified and a functional framework devised suitable for the organization needs in support of the security requirements.

Based on my individual objectives from my team I was able to accomplish the necessary assigned tasked. The experience gotten is new and extensive and part of my area of specialization. I am hopeful that the rest of the program will be a success as this one.

OBJECTIVES ACCOMPLISHED IN THE 1st QUARTER
The following are objectives accomplished whilst in the security team:
- Security threat Assessment.
- Development and deployment of ICT Authority projects cloud environment.
- Identification and migration of a thousand users to be licensed with mobility licenses.
- Development of several SharePoint work flows. Security sign in audits.

Report prepared by,
Njeri Vivian.
